

Teacher Training and Professional Development Report – Deep Global School

Teachers of Deep Global School actively engage in continuous professional development through various training programs organized by CBSE, Sahodaya, and online platforms like DIKSHA and NISHTHA. Our teachers have completed multiple certified training modules via the **DIKSHA App**, including *Foundational Literacy and Numeracy (FLN)*, *Art-Integrated Learning*, *Cyber Safety and Security*, and *Health and Wellness*.

In addition, CBSE's **Capacity Building Programs** on *Learning Outcomes*, *Classroom Management*, *NEP 2020 Implementation*, and *Competency-Based Education* have been attended by teaching staff. Senior teachers and the Principal have participated in leadership workshops such as *Pedagogical Leadership*, *School Governance and Planning*, and *Effective School Management*, conducted both online and through Sahodaya School Complex.

Deep Global School also organized **in-house training programs** on *Lesson Planning*, *Bloom's Taxonomy*, *Question Paper Setting*, and *Activity-Based Learning*, which included participants from nearby schools and junior colleges. These collaborative sessions enabled cross-learning and sharing of best practices.

These diverse training initiatives ensure that our educators remain up-to-date with modern pedagogies and national education goals, ultimately benefiting our students' holistic development.
